

ClickUp to Poppim Gap Review Worksheet

Prepared June 30, 2026. Goal: help the project manager decide which ClickUp elements POP Creations actually uses and which should be added or improved in Poppim before retiring ClickUp.

Evidence note: ClickUp was re-checked with the authenticated ClickUp MCP server after OAuth was completed. The MCP inspected workspace hierarchy, relevant Lists, representative open cards, custom fields, comments, threaded replies, attachments, linked tasks, time entries, and time-in-status. Direct browser screenshots of ClickUp were blocked by ClickUp's interactive login/SSO flow, so the ClickUp visuals below are MCP-verified evidence panels rather than raw browser captures. Poppim panels use live browser screenshots captured from the current app.

Annotated Visual Panels

Panel 1 - ClickUp Board / List Structure

CREATIONS

Licensing Management

24 statuses Tablero/Kanban

idea new prod form
concp appr
smpl req
prod appr

POP / SAMPLING

Sourcing/Sampling Projects

17 statuses

sales asks smpl
smpl rcv
sample done

POP / NEW PRODUCTS

New Prod Development

37 statuses

design brief
buyer approval
ready to submit

SPRUCE LINE

Edge Generic

19 statuses

in work
with buyer
complete

MCP verified Spaces/Folders/Lists, status columns, status ordering, list URLs, and dashboard search coverage.

Panel 2 - ClickUp Card Header / Board Card Signals

Image/attachment thumbnails found on richer cards

Cotton rope basket with embroidered applique - Stitch & Spiderman embroidery

Gina Salazar Due date High priority disney checklist 0/8

MCP sampled cards such as 8688ckee4 and 86892rzhm, confirming assignees, due dates, priority, tags, thumbnails/attachments, and checklist counts.

Panel 3 - ClickUp Custom Fields / Product Context

Customer / Retailer	HomeGoods, Burlington, Hobby Lobby, customer field
Buyer	Buyer field present on product tasks
Licensor / property	Disney, NBCU, Star Wars, Marvel, Peanuts, license field
Product type	Idea/Task Type, category, put-up, product naming
Factory / samples	Factory field, SMPL Req, sampling statuses and checklist gates

MCP verified custom fields across licensed, new product, sampling, and generic task samples.

Panel 4 - ClickUp Work Breakdown / Workflow Gates

CHECKLIST GATES

PPS Approval
Sampling request
Licensor Approval
Tech Packs
Buyer picks

SUBTASKS

Present on
8689emd23
Present on
8688ckee4
Present on
868gj2z0h

Long markdown descriptions found on richer cards; approval evidence appears in statuses, comments, and checklist language.

MCP verified checklists, subtasks, descriptions, approval language, and status-stage workflow evidence.

Panel 5 - ClickUp Comments / Files / Activity

Comment: @Gina Salazar / @Sarhani Ghosh mentions found in real card comments.

Thread reply: Replies retrieved for comment ids 90110065216379 and 90110064844524.

PDF attachments

Image thumbnail URLs

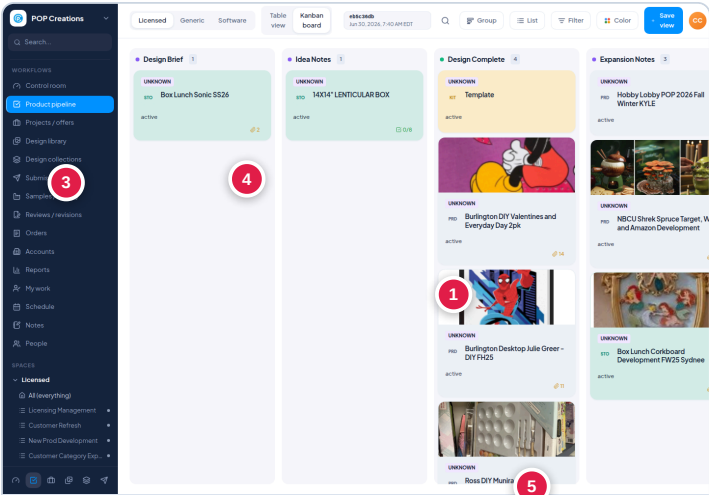

Created/updated timestamps

MCP verified comments, threaded replies, mentions, attachments, image preview URLs, and limited activity/status metadata.

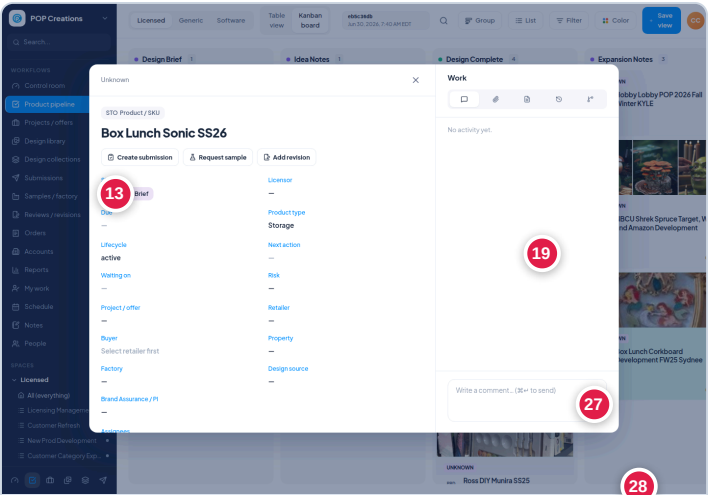

Panel 6 - ClickUp Relationships / Time / Blocking

Time in status	MCP call returned no task data; likely unavailable not exposed.
Time tracking	One time estimate found; time entries queried returned zero entries.
Linked tasks	Linked tasks present on 8689emd23, 8688ckee4, 86892rzhm.
Dependencies	Dependency fields exist, but sampled tasks had empty dependency arrays.

MCP verified relationships and partial time/dependency evidence; these need PM confirmation before implementation priority is set.

Panel 7 - Poppim board view. Shows department/list navigation, saved views, status columns, cards, covers, assignees, dates, tags/priority area, and checklist counts where available.

Panel 8 - Poppim detail main view. Shows product description/title area, imported/custom fields, customer/buyer/product context, licenser/property/type fields and factory/sample-related context.

Panel 9 - Poppim Collaboration / Imported Evidence

Checklist

Subtasks/Links

Comments

Files

Activity

11

Checklist items exist, but PM should decide which are required gates.

15

12

ClickUp subtasks are simplified and may need better assignee/date support.

16

14

Comments/files exist; mentions, threaded replies, and notifications are weaker.

17

18

20

Panel 9 - Poppim has collaboration surfaces, but several ClickUp behaviors are partial or need prioritization.

Panel 10 - Poppim Operations / Reporting Decisions

Time in stage: not visible yet

21

Time entries: imported sparsely

22

Linked products/tasks: present but rough

23

Dependencies/blockers: Operations tab concept exists

24

Decisions / approvals

25

Stage move rules / gates

26

Reports / Control Room

30

Panel 10 - Poppim has operating records and reports, but PM should decide whether ClickUp-style time, dependency, approval, and dashboard behavior is required.

30 Elements To Confirm

Use the panel references to find each numbered marker. Mark whether the team actually uses the ClickUp element and whether Poppim needs it before migration.

#	Element	ClickUp evidence from MCP	Current Poppim status / PM decision	Panels	Used?
1	Board columns / statuses	Licensing 24 statuses, Sampling 17, New Prod 37, Edge Generic 19.	Present, but legacy/empty stages should be cleaned up.	1,7	☐ Yes ☐ No
2	Card order inside a column	Status order verified; exact drag order not exposed by MCP.	Partial from ClickUp order index; PM should decide if exact order matters.	1,7	☐ Yes ☐ No
3	Spaces / Folders / Lists	POP Creations, Spruce Line, designflow, plus product folders/lists verified.	Mapped to departments and saved list views.	1,7	☐ Yes ☐ No
4	Saved views	List URLs verified; named saved views not enumerable through MCP.	Present as saved views; names/order need PM review.	1,7	☐ Yes ☐ No
5	Card cover images	Image attachments/thumbnails found; no distinct cover field exposed.	Present when image data exists.	2,7	☐ Yes ☐ No
6	Assignees	Assignees verified on sampled tasks.	Present on cards and detail modal.	2,7	☐ Yes ☐ No
7	Due dates	Due dates verified on sampled tasks.	Present, with Poppim date logic.	2,7	☐ Yes ☐ No
8	Priority flag	Low, normal, high, and null priorities found.	Partial; not a major workflow yet.	2,7	☐ Yes ☐ No
9	Tags	Tags such as disney, nbcu, click team only, template found.	Imported/shown; board filters need review.	2,7	☐ Yes ☐ No
10	Checklist counts on cards	Checklist unresolved/resolved counts found.	Present as counts.	2,7	☐ Yes ☐ No
11	Checklists	PPS Approval, Sampling request, Licensor Approval, Tech Packs, Buyer picks.	Present; PM should decide required gates.	4,9	☐ Yes ☐ No
12	Subtasks	Subtasks found on sampled cards.	Simplified; assignee/date behavior may need work.	4,9	☐ Yes ☐ No
13	Task description	Long markdown descriptions found on richer cards.	Present when imported, but not highly structured.	4,8	☐ Yes ☐ No
14	Comments	Comments present on richer sampled cards.	Present, but review mentions/threading needs.	5,9	☐ Yes ☐ No
15	Threaded comment replies	Threaded replies retrieved for real ClickUp comment ids.	Not fully present.	5,9	☐ Yes ☐ No
16	Mentions / notifications	@mentions found in comment bodies.	External notification behavior not present.	5,9	☐ Yes ☐ No
17	Attachments / files	PDF/image attachment URLs and metadata found.	Files/images present; upload/version workflow needs review.	5,9	☐ Yes ☐ No
18	File previews	Image thumbnail URLs found; PDFs expose attachment URLs.	Images preview better than PDFs/other file types.	5,9	☐ Yes ☐ No
19	Custom fields	Customer/Retailer, Buyer, Factory, Category, Due Date Licensor, SMPL Req, license, put-up.	Imported side pane; many not first-class editable fields.	3,8	☐ Yes ☐ No
20	Status history / activity log	Created/updated/current status available; full activity history not exposed.	Limited and not prominent.	5,9	☐ Yes ☐ No
21	Time in status	MCP bulk call returned no task data.	Not visible yet.	6,10	☐ Yes ☐ No
22	Time tracking entries	Time estimate found; sampled time entries returned zero entries.	Sparse import; not primary workflow.	6,10	☐ Yes ☐ No
23	Task relationships / linked tasks	Linked tasks found on sampled cards.	Imported links exist; management UX needs polish.	6,10	☐ Yes ☐ No
24	Dependencies / blocking	Dependency arrays exist but sampled tasks were empty.	Poppim Operations has blockers/dependencies, not ClickUp-style UX.	6,10	☐ Yes ☐ No

#	Element	ClickUp evidence from MCP	Current Poppim status / PM decision	Panels	Used?
25	Approvals / decisions	Approvals appear as statuses/checklists/comments, not separate objects.	Decision records exist; final approval workflow needs PM review.	4,10	☐ Yes ☐ No
26	Stage move rules	Status order verified; automations/rules not exposed by MCP.	Stage moves currently need clearer business gates if desired.	4,10	☐ Yes ☐ No
27	Product/customer/buyer context	Task names, descriptions, Customer/Retailer and Buyer fields verified.	Present; buyer feedback/history could be richer.	3,8	☐ Yes ☐ No
28	Licensor/property/product type	Disney, NBCU, Star Wars, Marvel, Peanuts, license and task type evidence.	Present.	3,8	☐ Yes ☐ No
29	Factory/sample information	Factory, SMPL Req, sampling statuses, checklist gates, and sample comments found.	Partial; sourcing/sample workflow needs PM review.	3,8	☐ Yes ☐ No
30	Reporting / dashboards	Dashboard search returned 0; reporting config not exposed by MCP.	Reports and Control Room exist, but role-specific dashboards need review.	1,10	☐ Yes ☐ No
